CN-ROLLER LEAD-SS, ULT2.0 ENT (SINGLE)

Description

These **stainless steel roller lead brackets** were design to center the roller through the roller up fork mechanism. These lead brackets prevent the roller from twisting and jamming against the conveyor structure as it is called up to the top tier to pull the vehicle. These roller leads are recommended for the Ultimate Conveyor 2.0 TUF Tip-Up-Fork Series (2007-2010)
