## RET CNHTUA CONVEYOR HYDRAULIC TAKE-UP ASSIST SYSTEM

### Description

This option will attach to your existing take-up spring assembly. It does not eliminate the spring, but assists in tightening the chain. PECO recommends this option if the conveyor length exceeds 150'. This system contains a cylinder, two air-over-oil reservoirs and a 4-way valve control assembly. This option is pre-assembled on the ultimate entrance section.
