ALARM INTERLOCK ALARM HORN (120VAC)

Description

This **alarm-horn** is typically used on a car wash safety interlock systems. The alarm horn produces 100db @ 10ft of sound to warn car wash employees that the car wash is about to start. An interlock control station is required to operate this alarm horn or a car wash controller capable of controlling a car wash safety interlock. This unit needs 120VAC @ 60 Hz input. This unit also needs the electrician to supply a standard 4" x 4" conduit box for wiring and mounting purposes.
